**DISTANT PAST**
**Extraordinary Indication Of Unnatural Perception**
**(Kayfabe Sounds)**

**Last year I had the opportunity to review the latest album ofm Emerald. So when I received the package from Distant Past and I saw the names Adriano Troiano (bass, vocals) and Christof Schafer (guitars) I remembered them from the Emerald days and I was really curious to hear their newest project. Actually now Adriano isn't in Emerald anymore so we can say that Distant Past is his main band. Musically they don't follow so much the epic metal paths but more the power metal ones with some progressive elements too. Also if you hear a lot of times the album you will see that the band has a gothic atmosphere but don't misunderstand it the band basically plays power metal. The thing that pushes a little bit back the whole project is the production but I am sure that in their next step the band will work more in this section. Last but not least, in one song you will see a guest appearance of Michael and Thomas Vaucher from the Swiss melodic heavy metal band Emerald.**
